

Business Intelligence

eDiscovery

Create a **fully searchable** document repository in which not a single bit of data remains hidden.

Turn your data into business value by **gaining full insight** into the wealth of your customer data.

What is Hyarchis eDiscovery?

eDiscovery is an application based on Artificial Intelligence that creates fully searchable document archives. Within information management, eDiscovery signifies the transition from document management to data management.

Regardless of file type, structure, age, and content, our application captures every bit of text within your documents accurately and organizes this text neatly.

Gain **full control** of the contents of your archive and gain unparalleled insight into the wealth of your customer data that you might have been unaware of for decades!

Security:

Our cloud environment is managed with state-of-the-art tooling to make sure that your customer data is always safe with us. Our solutions comply with **ISO 27001 & ISO 27018**

eDiscovery benefits

Compatible with any Document Management System (DMS)

Near 100% accuracy in data recognition

Transform static documents into active data sources

“Google search” your previously inaccessible archive

Suitable for unstructured documents of any file type

ISO 27001 & ISO 27018
